

Unleash the Future of the Phone

Innovative and Aesthetic Phone Expressions™

For years, customers have been asking for something more than the generic black or gray boxes in every office - telling us they want the phone to be more reflective of their business brand and personality. They want a phone set that combines high-end technology with avant-garde design.

Desk Phone Designs has delivered! We have created injection-molded, snap-on phone covers designed to fit numerous business phone models. Our hydro-graphic custom surface decoration technology turn business phones into amazingly beautiful designed devices that are a real treat for the eye. Our surface decoration technology offers the latest and most popular patterns and natural designs, like burl wood, walnut, marble, leather look, geometrical designs and many other abstract designs, which creates a new color and appearance on the telephone that enhances its value.

Our snap-on phone covers:

- **Require no tools for installation or removal**
- **Can be removed and cleaned with soap and water**
- **Protect the original features of the manufactured business phone**
- **Preserve the factory warranty**
- **Providing a protective cover limiting the exposure of dust and dirt**

To design the world with people in mind, you have to marry art and science using communication technology as the foundational medium when building the technologies and experiences that increasingly shape and connect our lives.
